ESTABLISHED IN 1974, the Metro New York Labor Communications Council (Metro) includes union communications professionals, who work for the city's public and private-sector unions and other organizations representing working people. They are editors and reporters, photographers and graphic designers, broadcast producers and public relations specialists. Metro provides a forum to discuss pressing issues in the labor movement, and shares ideas on how labor communicators can tell the story of working people in the mainstream media, through union publications and with the latest technology and social media.
